## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Behr et al. 6,107,944.

Behr et al. discloses an electronic navigation aid device comprising a processor and a memory adapted to communicate with the processor wherein the device is adapted to be transported on a road and wherein the processor and the memory are adapted to cooperate to provide an address that is proximate to the device and update the address as the device is transported on the road (Column 8 lines 31-49); wherein the processor and the memory are adapted to cooperate to determine the direction of travel and to estimate the address that is proximate to the navigational device along a driving side of the road according to local driving rules (Column 10 lines 34-37); wherein the displayed address on the display includes an address number and road name (Column 18 lines 9-24); wherein the portable electronic navigational aid device includes a person digital assistant PDA (Column 9 line 14-16); wherein the communication channel includes a wireless channel (Column 9 lines 5-9); comprising estimating an address proximate to a navigational aid device and displaying the address on the navigational aid device (Column 5 line 65 through Column 6 line 15); wherein estimating an address proximate

Art Unit: 3663

to a navigational device identifying a road upon which the navigational aid device is being transported (Column 6 line 30-39); wherein identifying a road upon which the navigational device aid device is being transported includes extracting road data based on a position and the accuracy of the navigational aid device and selecting a best road data element based on a comparison between both the road data and the travel direction and the position (Column 6 lines 16-29); wherein estimating an address proximate to a navigational device and displaying the address on the navigational device are triggered by periodic update events (Column 6 lines 40-46).
